Sodium	78mg

Sustainability

Snapper is managed under the Quota Management System (QMS). Snapper abundance is monitored using commercial catch rates, catch-at-age sampling, trawl survey information and abundance estimates from the recapture of tagged fish. Most of our snapper stocks are stable or increasing.

Cooking methods

Snapper has tender white-to-pinkish flesh with a sweet, mild flavour and is highly versatile in cooking. Try poaching it; cooking it on the bbq, baked, in a curry, marinated, smoked, using it in a soup/chowder, or frying snapper.

Product details

Available packed as: Whole, dressed and fillets.
